Foreword: Transitions in Vocational Education .........................................................11
  Jürgen Seifried and Eveline Wuttke

1 Assessing Occupational Aspirations for Vocational Counselling
  Hans Kayser, Gaby Steinritz, and Birgit Ziegler
  1.1 Supporting vocational transitions through theory and research ............19
  1.2 Testing of required conditions for an instrument to support vocational transitions.................................................................24
  1.3 Results ...................................................................................................27
  1.4 Discussion .............................................................................................31

2 Occupational Exploration in German Secondary Schools: What it is, How Schools Foster it, and How Students Perceive this Support
  Karin Heinrichs and Eveline Wuttke
  2.1 How can secondary schools support students’ career choices?..........38
  2.2 Theoretical perspectives on occupational exploration...........................41
  2.3 Research design: Measures and sample.................................................45
  2.4 Results ...................................................................................................46
  2.5 Discussion .............................................................................................51

3 Motivations and Difficulties in Transition from the Lower-Secondary Level to the VET Programmes in Switzerland
  Elena Boldrini and Luca Bausch
  3.1 Lower-secondary to upper-secondary school transition in Switzerland.........................................................................................57
  3.2 Case study: The Canton of Ticino ............................................................59
  3.3 The research project: the theoretical-conceptual framework..............60
  3.4 Research design.....................................................................................61
7 The Factors Facilitating School-to-Work Transition: The Role of Social Ties. A Longitudinal Qualitative Perspective .........................123
Nadia Lamamra, Marine Jordan, and Barbara Duc
7.1 Introduction .........................................................................................123
7.2 Theoretical elements ............................................................................125
7.3 Methodology .......................................................................................128
7.4 Results .................................................................................................129
7.5 Discussion ...........................................................................................137
7.6 Conclusion ...........................................................................................139

8 Exploring Personalized Learning in the Context of the Transition System.....................143
Marc Beutner, H.-Hugo Kremer, and Andrea Zoyke
8.1 Context: challenges in the Transition System .....................................143
8.2 Aims, research questions and research design of the explorative study .................................................................145
8.3 Results concerning Personalized Learning ........................................149
8.4 Outlook: personalized learning as challenge for the transition system ..................................................................................159

9 Transitions from Exclusion to Work Integration Social Enterprises and into the Labour Market........163
Almudena Navas and Fernando Marhuenda
9.1 Introduction .........................................................................................163
9.2 The content of work: learning trajectories and on-the-job training with transition as an aim .................................................................164
9.3 The pedagogic relation of work experience: an attempt to develop a theoretical approach .................................................................167
9.4 An analytical framework to describe and assess the pedagogic relation in WISE’s ..................................................................................173
9.5 WISE’s, employability and transitions: assumptions under scrutiny .................................................................................................179
10 Employability Assessment in Vocational Education and Transition to the Workplace ...........................................185

Ana I. Córdoba, Lucía Llinares, and Juan José Zacarés

10.1 Introduction: Vocational education and employability .........................185
10.2 Concept and dimensions of employability ...........................................187
10.3 Instruments to measure and analyse employability...............................191
10.4 Implications of the concept of employability for VET: a viable relationship ..........................................................................................................................196

11 Perceived Continuity and Discontinuity in the Transition from School to Work: The Voice of a Group of Italian Young Adults .............................................205

Viviana Sappa, Carmela Aprea, Laura Bonica, Susanna Bustino, and Elisa Russello

11.1 Introduction .............................................................................................205
11.2 Method .....................................................................................................209
11.3 Results ......................................................................................................213
11.4 Data interpretation and discussion..........................................................217
11.5 Implications and conclusions ..................................................................218

12 Higher Education and Work – Transitions framed by time and space.................................................................223

Mariana Gaio Alves

12.1 Opening remarks ....................................................................................223
12.2 Transitions from education to work in contemporary societies..............224
12.3 Higher education graduates’ transitions to/from work within a certain time and space .................................................................................................................229
12.4 Concluding remarks ..............................................................................239
13 Job Entry Phase in the Teaching Profession – Theoretical and Empirical Considerations with Special Regard to the Concept of Reflection.............243
Corinne Wyss
13.1 Introduction .............................................................243
13.2 Important components of the teaching profession and teacher induction..........................................................246
13.3 Research project about teachers’ ability to reflect.........................253
13.4 Concluding remarks ......................................................................257

14 Mature Age Students’ Successful Transition into Higher Education: Factors and Interdependencies.....263
Stephen Billett and Jean Searle
14.1 Participation and retention in higher education.........................263
14.2 Transition into higher education.................................................265
14.3 Social affordances and individual engagement .......................267
14.4 Adult students’ transition to higher education: an investigation ......269
14.5 Principal factors in positive and negative moments ...................271
14.6 Affordances and transitions........................................................277
14.7 Transitions to adults’ participation in higher education ............279

15 Navigating the Labour Market: Transitioning Styles of Adults Receiving Career Guidance .............283
Jenny Bimrose and Alan Brown
15.1 Introduction .............................................................................283
15.2 Labour market transitions of adults receiving career guidance ......284
15.3 Conclusion..................................................................................302

16 Transitions of Expertise..............................................................309
Andreas Gegenfurtner
16.1 Introduction .............................................................................309
16.2 Is there a synergy between technology-enhanced learning and workplace learning? ..........................313
16.3 Horizontal and vertical transitions in technology-mediated learning and working environments .................................................... 314
16.4 Conclusions and future directions ....................................................... 319
